

## Placement Testing

ACCUPLACER is an integrated system of computer-adaptive assessments designed to evaluate a student's skills in reading, writing, and mathematics.

- Reading Comprehension:** This test, comprised of 20 questions, measures your ability to understand what you read, to identify main ideas and to make conclusions.
- WritePlacer (Writing):** The WritePlacer test, a written essay, measures your ability to write effectively and will be scored on the basis of how you communicate a purpose-driven message in at least 300 words.
- Mathematics:** Scratch paper and pencils are provided to work out problems for this test. No personal calculators are allowed, but one will be provided for specific questions.

The ACCUPLACER test is administered by the Admissions Office at no cost to the student; however, one retest is provided at the cost of \$8. Scores are valid for three years. The tests are taken at a computer. No calculator is allowed for the math portion, but pencil and scratch paper is provided.

Students who have previous college credit in college-level English and mathematics with a grade of "C" or better and students who have an associate degree or higher are not required to take the test. ACT score exemptions are detailed in the placement chart that follows, and SAT score exemptions can be provided upon request.

### ACCUPLACER Preparation

Free ACCUPLACER study material is available for practice at the following websites:
